#### Treasury management

Whether the business is a UK start-up or inward investing company a business bank account is mandatory. To get the business up and running quickly and to remove the time and administration in setting up a UK bank account Horwath Clark Whitehill will set up the account for you or can offer you the use of our client account.

In addition to this service our partners are available, if required, to act as bank signatories, eliminating the need for you to sign cheques for invoice payment runs or payrolls and expenses which may have already been outsourced to our Accounting Solutions Group – allowing you the freedom to concentrate on running your business.
